

Safety Decision Packet

SAFETYSIGNAL DESK · CASE SS-CO-0426 · BATCH CO-CPB-0426

CRITICAL · 100/100
Human review required

Case Summary

- Product: Cedar & Oat Cocoa Protein Bar
- Batch: CO-CPB-0426
- Case ID: SS-CO-0426
- Review Status: Human Review Required
- Signal Strength: High
- Risk Level: Critical (score 100/100)

Key Findings

1. 14 complaints received in 6 days.
2. 12 complaints linked to batch CO-CPB-0426.
3. 9 complaints describe allergic reaction symptoms.
4. 5 complaints mention peanut allergy.
5. 2 complaints mention urgent care or doctor visit.
6. Consumer label declares only: milk, almond (no peanut).
7. Supplier ingredient sheet lists peanut flour or peanut cross-contact.
8. 3,800 units remain in inventory or retailer channels.

Agent Reasoning

Complaint Intake. Consumers are reporting allergic-type reactions after eating the Cedar & Oat Cocoa Protein Bar, with several complaints tied to batch CO-CPB-0426. Multiple reports mention peanut allergy concerns and note that the label references almonds and milk but does not mention peanuts. Some complaints also describe a different taste or throat irritation, and a few reports mention retailer questions about whether peanuts are included.

Label & Ingredient. The consumer label does not declare peanut, but the supplier ingredient sheet explicitly identifies peanuts in the allergen declaration and notes peanut flour may be present in the blend. This mismatch creates a risk for consumers with peanut allergy because the product may contain an undeclared peanut allergen. The label also lists only milk and almonds under "Contains," which does not match the supplier's peanut declaration.

Recall Precedent. The provided openFDA Food Enforcement records show three Class I precedents involving undeclared peanut or contains undeclared peanut, each associated with a firm-initiated recall or public safety notice. For a suspected undeclared-peanut case involving Cedar & Oat Cocoa Protein Bar (batch CO-CPB-0426), these records support using the same general response pattern and risk framing seen in the precedents, without making any determination about the product itself. The cited cases indicate that consumer notices for undeclared peanut typically emphasize the serious allergic reaction risk for people with peanut allergy.

Regulatory Risk. This case warrants CRITICAL risk and human review because the complaint pattern is highly concentrated and fast-moving: 14 complaints arrived within 6 days across 4 channels, with 12 tied to the same batch (86%). The escalation is further elevated by medical-severity mentions, a potential undeclared allergen and label inconsistency, and the fact that 3,800 units remain in market or inventory. The fired policy triggers also include urgent-care/doctor/swelling references and a strong public recall precedent match, supporting immediate escalation.

Risk Scoring (100/100 — CRITICAL)

Category	Points	Max	Basis
Complaint volume and timing	20	20	14 complaints within 6 days; across 4 channels
Batch concentration	20	20	12/14 complaints on same batch (86%)
Medical severity	20	20	2 medical-escalation mentions
Label or ingredient mismatch	25	25	potential undeclared allergen
Market exposure	10	10	3,800 units still available
Public recall precedent	5	5	strong public recall precedent match

Company-policy escalation triggers fired:

- 12 complaints on one batch within 6 days (>5/7d)
- complaints mention urgent care / doctor / swelling
- suspected undeclared major allergen (peanut)
- retailer/customer reports label inconsistency
- 3,800 units remain in market/inventory (>1,000)

Public Recall Precedents (STRONG match)

Source: openFDA Food Enforcement (live).

Recalling Firm	Recall #	Class	Reason
Zingerman's Coffee Company	H-0179-2026	Class I	Undeclared peanut
Vita Warehouse Corp.	H-0212-2025	Class I	Contains undeclared peanut
South Asian Food Inc.	H-0008-2025	Class I	Contains undeclared peanut

Recommended consumer-notice language: People with peanut allergy may risk serious allergic reaction if they consume the affected product.

Agent Findings

Complaint Intake Agent

Extracted 14 complaints for Cedar & Oat Cocoa Protein Bar. 9 describe allergic reactions, 5 mention peanut allergy, 2 mention urgent care or a doctor. Batch CO-CPB-0426 appears in 12 complaints.

Pattern Detection Agent

Cluster detected — signal HIGH. 12/14 complaints (86%) tie to batch CO-CPB-0426 over 6 days.

Label & Ingredient Agent

—

Batch Trace Agent

Batch CO-CPB-0426: 12,000 produced, 8,200 sold, 3,800 still in inventory/retail across 4 retailers (CA, NY, Online, TX).

Recall Precedent Agent

STRONG precedent match. 5 real FDA undeclared-peanut enforcement records found (live). Examples: Zingerman's Coffee Company, Vita Warehouse Corp., South Asian Food Inc..

Regulatory Risk Agent

Risk CRITICAL (score 100/100) — HUMAN_REVIEW_REQUIRED. 5 company-policy escalation triggers fired. Blocking unsafe automatic messaging; routing to the human recall manager.

Customer & Retailer Response Agent

—

Recommended Actions

- Place affected batch on internal hold
- Notify affected retailers to pause sale pending review
- Prepare recall decision packet for QA, legal, and regulatory review
- Collect missing customer evidence
- Prepare regulatory escalation assessment for human review

Blocked Actions

- Do not send public recall notice without human approval
- Do not tell customers the product is confirmed safe
- Do not dismiss complaints as isolated

Draft Communications (NOT sent — require human approval)

Retailer Hold Notice

DRAFT — Pending human review and approval.

Subject: Immediate hold request — Cedar & Oat Cocoa Protein Bar, Batch CO-CPB-0426

Please place an immediate hold on all inventory of Cedar & Oat Cocoa Protein Bar, batch CO-CPB-0426, across all locations and fulfillment channels, including FitCart Online, HarvestLane Stores, Northstar Market, and WellBasket Retail.

Reason for hold: a potential undeclared peanut allergen concern has been identified and is under review.

Requested actions:

- Stop sale and distribution of the affected batch immediately.
- Quarantine all remaining units of batch CO-CPB-0426.
- Do not relabel, rework, or dispose of product until further instruction.
- Confirm on-hand quantities, locations, and any units already shipped or transferred.
- Preserve lot codes, shipping records, and related traceability documentation.

Affected inventory: approximately 3,800 units.

Please acknowledge receipt and provide a status update as soon as possible. This notice is a draft and requires human approval before external use.

Customer Support Reply

DRAFT — Pending human review and approval.

Thank you for contacting us about Cedar & Oat Cocoa Protein Bar, batch CO-CPB-0426.

We are currently reviewing a potential undeclared peanut allergen concern associated with this batch. Out of an abundance of caution, we recommend that customers who have a peanut allergy or sensitivity do not consume the product until the review is complete.

If you have already consumed the product and are experiencing symptoms of an allergic reaction, seek medical attention immediately.

Please retain the product packaging, including the batch code, and contact us with your purchase details so we can assist with documentation and next steps.

This message is a draft and requires human approval before use.

Internal QA Task

DRAFT — Pending human review and approval.

Task: Investigate potential undeclared peanut allergen in Cedar & Oat Cocoa Protein Bar, batch CO-CPB-0426.

Scope:

- Confirm ingredient sourcing, formulation, and production records for batch CO-CPB-0426.
- Review allergen changeover, sanitation, and line clearance documentation.
- Verify label artwork, packaging reconciliation, and any rework or repack activity.
- Check for cross-contact risks from shared equipment, ingredients, or storage.
- Reconcile finished goods inventory and distribution across FitCart Online, HarvestLane Stores, Northstar Market, and WellBasket Retail.
- Identify all affected lots, production dates, and downstream shipments.

Deliverables:

- Preliminary root-cause assessment.
- Traceability summary for the affected 3,800 units.
- Recommendation on whether escalation, market action, or additional testing is warranted.
- Supporting records and photos, if available.

Priority: High. This task is a draft and requires human approval before execution.

Public Statement Draft

DRAFT — Pending human review and approval.

We are reviewing a potential undeclared peanut allergen concern involving Cedar & Oat Cocoa Protein Bar, batch CO-CPB-0426.

Out of an abundance of caution, customers who have a peanut allergy or sensitivity should not consume product from this batch until further notice.

The affected batch was distributed through FitCart Online, HarvestLane Stores, Northstar Market, and WellBasket Retail. We are working with our retail partners and reviewing distribution records.

Consumers who have purchased this product should retain the packaging and contact customer support with the batch code and purchase details.

This statement is a draft and requires human approval before any external release.

Human Decision

- Decision: Approved Batch Hold
- Notes: Approve immediate batch hold and retailer notification. Prepare recall packet for QA, legal, and regulatory review.
- Timestamp: 2026-06-19T15:11:03.506739+00:00

Reasoning Provenance

Scores, counts, batch exposure, and the undeclared-allergen detection are computed deterministically and are not model-generated. Where an agent's language is AI-generated it is marked `llm` below.

- Complaint Intake Agent: Ilm
- Label & Ingredient Agent: Ilm
- Recall Precedent Agent: Ilm
- Regulatory Risk Agent: Ilm
